

MR

MANGANOROBOT
ENGINEERING AUTOMATION SOLUTIONS

SINCE 2006 WITH PASSION AND ENTHUSIASM

Our technicians are able to perform Robot programming for the products of the leading brands of the industry as: Kuka, Abb, Fanuc, Comau, Motoman and Kawasaki and types of PLC such as [SIEMENS](#), [ALLEN BRADLEY](#), [SCHNEIDER](#), [MITSUBISHI](#), [TELEMECANIQUE](#), [OMRON](#).

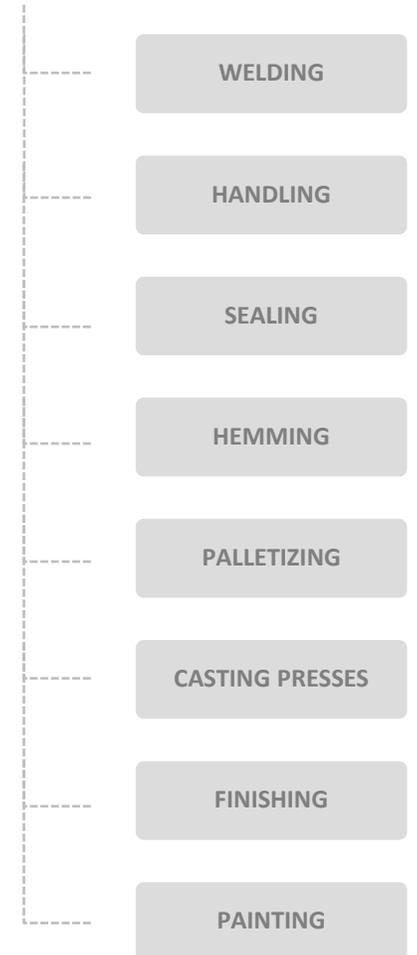

Main Applications

for large industrial production lines

We develop and provide solutions for large industrial production lines

The internal crew, supported by valid external collaborators, and always ready to keep abreast of permanently evolving new technologies, allow us to guarantee our customers a professionally working team for any operational requirements.

Our excellent knowledge of latest technologies related to production processes, allows us to minutely manage & control the handling of all resources needed; the timing and method of production as well as cost containment. In collaboration with design firms and qualified suppliers in mechanical and electrical construction, we can also provide a support service and comprehensive advice to small and medium-sized companies that want to increase their production by reducing operating costs

OUR VISION

The knowledge of the technologies related to the production processes allows us to control the management of the necessary resources and the containment of costs.

Efficiency, quality and reliability

Thanks to proven experience in various industries gained in the years by our crew of technicians, we are able to offer professional consulting in new or already existing industrial installations, such as the feasibility study and optimization of the production process, both during project phase and production phase.

Our objective, in all cases, is to improve the efficiency, quality and reliability of the various automated systems.

OUR MISSION

Develop and apply industrial solutions for the large production lines of industries all over the world, with the collaboration of certified expert technicians.

Manganorobot is **Worldwide**

Our offices over the world

Since 2006, we've been based in Turin, Italy. We strive to earn the trust placed in us by our clients and carry out projects that we are proud to present to the world.

We have operational offices in Atlanta, Belgrade, Rastatt, Tashkent, Ljubljana and Bangkok. Together, they cover all aspects of business and develop with our technicians industrial solutions for the large production lines of industries all over the world.

Training Center

in Serbia and Uzbekistan

In our training centre, we train future PLCs and robot developers. We bought the latest Kuka ready to aducate cell for these needs.

This is a unique training centre in the region.

Robot and PLC programming

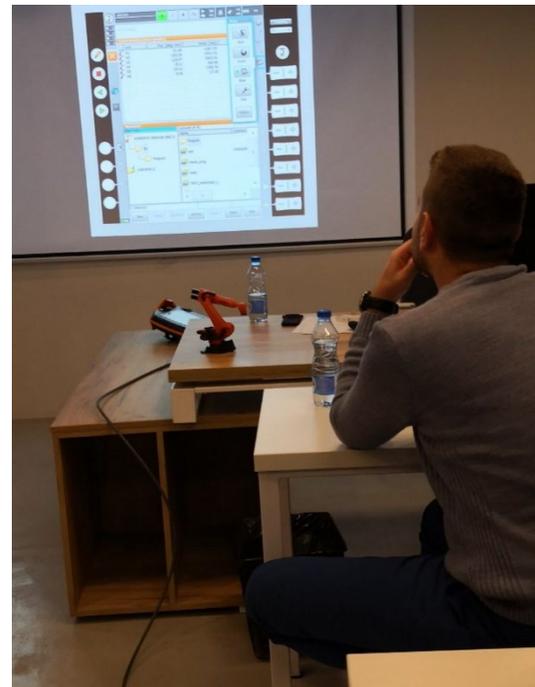

In our training centre, we train future PLCs and robot developers. We bought the latest Kuka ready to aducate cell for these needs.

This is a unique training centre in the region.

PLC AND ROBOT PROGRAMMING TRAINING

The advantage of using our training is undoubtedly the ability to organize tailor made courses, according to the needs of the customer. All our courses are designed and developed with the idea of training technicians who have to be immediately put into action. It is therefore a combination of theoretical learning and practicing online/offline
